## Remove the complexity from HIPAA security and privacy

Rapid changes in technology and compliance requirements make it difficult to stay current to maintain a competitive advantage and prove compliance. It is more critical than ever for organizations to work with trusted-partners who understand the requirements, evaluate, deploy customized security measures to receive the benefits of compliance.

For years, organizations have relied on antiquated spreadsheets and expensive technology solutions (HI-TRUST-like models that don't prove to reduce breaches) to manage their HIPAA Security requirements and protect ePHI. Now there is an affordable alternative.

Modern Compliance Solutions brings the value of legal, technical, audit and best-practices to address all of your HIPAA policies & procedures, processes, awareness training and proof-of-documentation needs. We developed an advanced cloud-based software solution that addresses all critical compliance needs in one place called, HIPAA One.®

Whether you have one location or many, Modern Compliance Solutions can help you remove the complexity of HIPAA/HITECH compliance.

# HIPAA Compliance and Data Security

Confidently Prove Compliance

We are your trusted partner for both short and long-term initiatives. Our team of Auditors are adaptable, flexible and extremely detail-oriented to ensure success. Here is an overview of our core Products and Services to help your organization meet its compliance goals:

## Risk Assessment

The risk assessment is the first step needed to implement any HIPAA-compliance program. Areas we assess using HIPAA One® include:

- Policies and Procedures
- Encryption/Technical Security Measures
- Processes and continuity planning
- Business Associates
- Awareness programs, training and reminders
- ePHI Assets

## HIPAA/HITECH Risk Analysis

Modern Compliance Solutions has extensive experience responding to audits with a 100% success-rate. Proving compliance is easy using our extensive knowledge of the NIST Framework and deliver customized solutions that are tightly aligned with best practices, federal and state regulatory requirements, NIST SP 800-30, NIST SP 800-53 rev. 4, and ISO 27002. Per the OCR Audit-Protocol, we cover:

- 78 Security Audit Protocols §164.308-316
- 81 Privacy Audit Protocols §164.502-530
- 10 Breach Protocols §164.404-414
- Protect ePHI
- MACRA & HIPAA Omnibus
- Audit-response support

Deliverables are provided on our HIPAA One® solution which automates all mundane, labor-intensive and error-prone tasks improving productivity and reducing costs.

## Technical Evaluation

Demonstrating due diligence in evaluating your technology environment and breach avoidance is critical. Our comprehensive technical evaluation will identify and address areas that increase the risk of PHI exposure. The key activities include:

- Penetration Testing
- Ethical hacking
- External Vulnerability Scanning
- Source-Code Review
- Social Engineering

We'll summarize the key findings and provide recommendations to improve systems and lower the risk of breach.

## Trusted Partner

Regardless of your organization's size and needs, we can deliver value-add solution to simplify, automate the complexity of HIPAA compliance using the HIPAA One® program. Reducing risk and providing peace of mind is what we do.
